ABSTRACT

IN THIS TWELFTH ANNUAL REPORT IN THE SERIES OF BULLETINS ON THE HOLDING POWER AND GRADUATES OF KENTUCKY HIGH SCHOOLS, AN OVERVIEW OF A 10-YEAR PERIOD OF GROWTH (1957-1967) IS PRESENTED IN ADDITION TO THE USUAL ANALYSIS OF DATA FOR THE GRADUATING CLASS OF 1967. COMPARATIVE DATA ARE PRESENTED ON THE DROPOUT RATES OF KENTUCKY SCHOOLS AND ON THE WHEREABOUTS OF GRADUATES OF ALL KENTUCKY HIGH SCHOOLS. THE DATA ARE ORGANIZED ON A STATEWIDE, REGIONAL, AND INDIVIDUAL SCHOOL BASIS. (DK)

FOREWORD

I am pleased to make available to the schools of Kentucky and to the public in general the Twelfth report in a series starting in 1956 on holding power and graduates of Kentucky high schools. While largely quantitative in nature, it is believed that the continuing study of the factors related to holding power will help to supply a key dimension for evaluation of educational outcomes -- the ultimate measures of a good school.

The analysis of the data relating to the class of 1967 provides much tangible evidence of the "population explosion" starting in 1946. The public is prone to forget that the effects of the "enrollment explosion" was thrust on Kentucky schools in the early 1950's following a war-time moratorium on most all construction including sorely needed school buildings. A crash building program was demanded when the State and local school systems were least ready for it.

Now that secondary school-age population is being stabilized somewhat, it should be noted throughout the report that increased holding power is rapidly becoming a significant factor in determining the number of graduates. At the 1957 rate of ninth-grade completion (58.7%), the 40,850 graduates of 1967 would have been reduced by 5,374 graduates. This would have been a tragic loss of the State's most precious resource, if the nine percent increase in holding power had not taken place.

The accommodation of record elementary and secondary enrollments during the decades of the Fifties and Sixties, under seeming insurmountable odds in many school districts, is only a part of the true measure of gains in education under the State's Foundation Program. It is hoped that this bulletin will be helpful to you in interpreting education's many facets of growth to the public. Your comments and suggestions for future releases will be appreciated.

Wendell P. Butler

Wendell P. Butler
Superintendent of Public Instruction

ACKNOWLEDGMENTS

A generous amount of credit for this twelfth report of a continuing series on holding power and graduates belongs to the high school principals of Kentucky, the Bureau of Instruction, and the Bureau of Pupil Personnel Services.

Even with recent changes in reporting procedures, the high school principals continue to build quality into the annual October High School Report which is submitted to the Division of Elementary and Secondary Education. The Fall report serves as the basic resource document for the school's curriculum and instructional patterns, state accreditation of secondary schools, and continuing studies using existing administrative data.

Special acknowledgment is extended to the Bureau of Instruction; in particular, D. C. Anderson, director, Division of Instructional Services and members of his staff for cooperation and assistance in providing usable data. Grateful appreciation is also expressed to the Bureau of Pupil Personnel Services; especially Lee Tyler, director and Lois Johnson, principal clerk, in the Division of Pupil Personnel Attendance and Accounting. Reports from this division made possible the analysis of age-grade data and verification of much common pupil personnel data from two separate sources--the principal's report and the superintendent's annual statistical report.

Finally, special thanks go to Isabel Triplett of the Research office staff who assumed major responsibility for organizing and typing the report with assistance from Brenda O'Brien on special sections.

INTRODUCTION

The twelfth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools has the enlarged purpose of providing an overview of a ten-year period of growth (1957-67) in addition to presenting the usual analysis of data for the graduating class of 1967.

In the 1956-57 school year the full financing of the State's Foundation Program Law, enacted in 1954, marked the beginning of a new era in public education in Kentucky. While there are many dimensions of a comprehensive state-local-federal plan for providing full educational opportunity for children and youth, it is generally agreed that the ultimate criterion of adequacy is the quality and quantity of educational outcomes made possible through its operation. Using the first full year of financing of the Foundation Program as the base year, (1956-57), the following comparisons point up for one measure only the ten-year growth and expansion of the secondary education program in Kentucky.

> The increase in the number of high school graduates for the Class of 1967 as compared to the Class of 1957 is 17,572 or 75.5 per cent.
>
> The increase in births in the corresponding years 1949 and 1950 (Class of 1967) as compared to 1939 and 1940 (Class of 1957) was 24,989 or 20.1 per cent.
>
> The percentage of all graduates in 1957 in terms of total ninth grade enrollment four years earlier was 58.7 per cent. The comparable holding power figure for the Class of 1967 is 67.6 per cent.
>
> The increase in holding power from the ninth grade through graduation is 8.9 per cent or an increase of approximately 0.9 per cent per year for the ten year period, 1957-1967.
>
> The increase of graduates in the Class of 1967 over the Class of 1957, directly attributable to increased holding power is 5,374 or 30.6 per cent.

The number of complete public high schools with graduating classes was decreased from 427 in 1957 to 320 in 1967 -- a decrease of 107 schools or 25.1 per cent.

The number of complete public high schools, having a graduating class of 100 or more increased from 64 public schools, or 16.3 per cent in 1960, to 130 high schools, or 40.6 per cent in 1967.

The number of complete public high schools in 1960 with graduating classes less than 30 in size was 112, or 28.5 per cent of total schools; in 1967, there were 32 schools, or 10.0 per cent of total schools.

in 1960, the 64 high schools with graduating classes of 100 or more had enrolled 43.9 per cent of total ninth grade enrollment four years earlier, produced 43.6 per cent of total graduates, and reported 49.6 per cent enrolling in college in the fall term following graduation.

In 1967, the 130 public high schools with graduating classes of 100 or more had enrolled 70.1 per cent of total ninth grade four years earlier, produced 71.0 per cent of all graduates, and reported 72.6 per cent of total graduates enrolling in college in the Fall of 1967.

A comparison of survival ratios in all Kentucky high schools for 1957 and 1966 reveals the following grade level changes:

Grade	Kentucky Survival Ratios Per 1,000		Change
	1957	1967	
Nine	1,000	1,000	--
Ten	878	893	+ 15
Eleven	726	796	+ 70
Twelve	625	706	+ 81
Graduates	587	676	+ 89

Generally comparable national retention rates for 1956 and 1965 are as follows:[1]

Grade	Survival Ratios Per 1,000		Change
	1956	1965	
Nine	1,000	1,000	--
Ten	921	937	+16
Eleven	818	864	+46
Twelve	717	809	+92
Graduates	673	758	+85

A comparison of Whereabouts of Graduates of all Kentucky high schools, 1957 and 1967, reveals the following changes in a ten-year span in the standard categories for which principals provide data: [1]

	1957	1967	Change	% Change
College or University	7,510	18,196	+ 10,686	+ 142.3
Trade, Technical, Nursing School	1,002	3,538	+ 1,889	+ 114.6
Business School	647			
Sales or Office	3,704	10,850	+ 3,731	+ 52.4
Farming	963			
Factory or Trade	2,452			
Other Employment Including Military	2,142	1,345	- 797	- 37.2
At Home	3,325	4,582	+ 1,257	+ 37.8
Unknown	1,533	2,257	+ 724	+ 47.2
Other	--	82	--	--
Total	23,278	40,850	+ 17,372	+ 75.5

In the Fall of 1957, 9,159 or 39.3 per cent of June graduates were reported entering a formal program of education beyond the high school. In the Fall of 1967, principals reported 21,734 or 53.2 per cent of the 1967 graduates enrolled in college or university, trade, technical, nursing school or business school.

A graphic portrayal of the growth pattern is shown on the following facing pages.

---

[1] Revision of Principal's Annual Report in 1966 resulted in changes in categories reported on by principals which limits the comparability of items to broad approximations except for "college or university".

Source and Interpretation of Data

There are two primary sources of data on public high school graduates: the principal's annual report and the superintendent's end-of-the-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade.

Reporting the Data

Charts 1 and 2 help to explain the rapid growth of secondary education in the post-World War II period. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1, 2, 3 and 4.

Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1959-60 with the current year, 1966-67. For the first time, a comparable summary is provided for non-public high schools.

Chart 3. Kentucky Births, 1930-66

HIGHLIGHTS

In 1966-67, from the 320 complete public high schools, (including Regional and Federal), there were 35,952 graduates, or 66.2 per cent of the total number of 54,295 ninth grade enrollment in 1963-64. Of the total graduates, 17,783 or 49.4 per cent were boys and 18,168 or 50.6 per cent were girls.

From the 68 non-public high schools, there were 4,898 graduates or 79.8 per cent of the total number of 6,141 ninth grade enrollment in 1963-64. Of the total graduates, 2,441 or 49.8 per cent were boys and 2,457 or 50.2 per cent were girls.

From the total public and non-public high schools, there were 40,850 graduates or 67.6 per cent of the total number of 60,436 ninth grade pupils enrolled in 1963-64. Of the total graduates, 20,224 or 49.5 per cent were boys and 20,625 or 50.5 per cent were girls.

Of the graduates of public high schools, there were 15,352 or 42.7 per cent reported as enrolling in college or university. Of this number 8,120 or 52.9 per cent were boys and 7,232 or 47.1 per cent were girls.

There were 2,844 graduates, or 58.1 per cent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,660 or 58.4 per cent were boys and 1,184 or 41.6 per cent were girls.

From all high schools, there were 18,196 graduates, or 44.6 per cent of the total number of 40,850 graduates, reported enrolling in college or university, Fall 1967.

Reported enrolling in some type of formal education program beyond the high school including college and university were: public high school graduates, 18,546 or 51.6 per cent of total public graduates; non-public high schools, 3,188 or 65.1 per cent; and for all high schools, 21,734 or 53.2 per cent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1963-64) for all high schools was: tenth grade, 893; eleventh grade, 796; twelfth grade, 706; and graduates, 676.

Sixty-seven and six-tenths (67.6) per cent of the total ninth grade enrollment four years earlier completed high school in 1966-67; an increase of 0.6 per cent from 1965-66. The approximate national average is 75 per cent.

For all Kentucky high schools, 44.6 per cent of all graduates in June, 1967 were reported enrolling in college or university in the Fall of 1967. The approximate national average is 53 per cent.

For all Kentucky high schools, 301 per 1,000 ninth grade pupils completed high school and enrolled in college or university. The approximate national average is 400 per 1,000.

Age of Public High School Graduates

Variability in age of public high school graduates has been significantly reduced as shown by the lower and upper extremes of the age distribution for 1967 as compared to the Class of 1957. Eighty per cent or more of the graduates in both 1957 and 1967 are almost equally divided between ages 17 and 18, (see Tables 13 and 14 in Appendix).

In 1957, there were 984 graduates or 4.84 per cent, age 16 or under; 612 or 5.7 per cent girls, and 372 or 3.9 per cent boys. Boys and girls in independent districts tended to graduate at an earlier age than boys and girls in county districts.

In 1967, there were 380 graduates or 1.1 per cent, at age 16 or under; 250 girls, or 1.4 per cent, and 130 boys, or 0.7 per cent.

The slight difference in per cent of graduates 16 and under in favor of independent districts in 1957 (5.20 to 4.7) has switched to county school districts in 1967 (1.3 per cent to 0.5 per cent). What appears to be most significant in the changing age pattern is that the increased scholastic requirements and quality of programs in 1967 are of sufficient magnitude to challenge and hold all students through ages 17 or 18.

In 1957, 80.8 per cent of boys and 88.2 per cent of girls had completed high school at age 18 or under. In 1967, the comparable age percentages had increased to 85.6 per cent for boys, and 92.4 per cent for girls.

What about the graduates beyond age 18? In 1957, the number of boys at age 19, 20, and 21 and over, accounted for 14.5, 3.1, and 1.6 per cent respectively. For girls, these age groups accounted for 9.5, 1.7, and 0.6 per cent of graduates. Or, in summary, 1,841, or 19.2 per cent of boys were 19 years of age or over. For girls, 1,267 or 11.8 per cent were 19 years of age or over.

In 1967, the following percentages are noted in the over--18 age pattern with 10-year decrease shown in parenthesis:

	Boys		Girls		Totals	
Age 19	11.2	(-3.3%)	6.1	(-3.4%)	8.6	(-3.2%)
Age 20	2.7	(-0.4%)	1.2	(-0.5%)	1.9	(-0.5%)
Age 21 +	0.5	(-1.1%)	0.3	(-0.3%)	0.4	(-0.7%)
Totals	14.4	(-4.8%)	7.6	(-4.2%)	10.9	(-4.4%)

The following approximate regional norms for ninth grade completing high school, graduates to college, and ninth grade to college are reported by KEA districts.

KEA District	9th Grade/1,000 Completing High School	Graduates/1,000 to College	9th Grade/1,000 to College
FIFTH	699	427	298
FIRST	715	536	383
CKEA	654	464	303
SECOND	703	449	316
FOURTH	695	398	277
NKEA	648	363	235
THIRD	679	431	293
UKREA	563	419	236
EKEA	640	401	257
UCEA	578	399	231
MCEA	621	373	232
Average*	662	427	283

*Derived data from Table 3

Changing Senior Class Size

In 1959-60, Kentucky public school districts operated 393 complete high schools with 112 schools or 28.5 per cent having graduating classes with less than 30 graduates, and 64 schools or 16.3 per cent having graduating classes of 100 or more members (Chart 8).

The 112 smaller schools produced 2,190 graduates or 8.5 per cent of all public high school graduates in 1960, the 64 larger schools accounted for 11,215 or 43.6 per cent of total graduates.

The smaller schools (112) had a holding power of 59.6 per cent, and reported 25.9 per cent of graduates enrolling in college; the larger schools (64) had a holding power of 61.4 per cent, and reported 40.0 per cent of graduates enrolling in college.

The average size of graduating classes for the 112 small schools was 19.6, the range from 3 to 29; the average size of graduating classes for the 64 large high schools was 175; the range 100 to 507.

In 1966-67, there were 320 complete public high schools with 32 schools, or 10.0 per cent having graduating classes with less than 30; and 130 schools, or 40.6 per cent, with graduating classes of 100 or more members (Chart 9).

The 32 small schools produced 750 graduates or 2.1 per cent of total graduates; the 130 large schools, 25,536 graduates or 71.0 per cent of all graduates.

In eight years, the 32 schools showed an increase in holding power from 59.6 to 62.3 per cent, and reported 291 or 38.8 per cent of their graduates enrolling in college as compared to 25.9 per cent in 1960.

The 130 large schools showed an increase in holding power from 61.4 to 67.1 per cent, and reported 11,138 or 43.6 per cent of their graduates enrolling in college as compared to 40.0 per cent in 1960.

The average size of graduating class for the 32 schools with graduating classes of 29 or less was 23.4; the range from 7 to 29; the average size class for to 130 large schools was 196.4, the range from 100 to 608.

In 1967, there were 42 non-public high schools with 18, or 26.9 per cent, having graduating classes of less than 30, and 18 or 26.9 per cent having graduating classes of 100 or more (Chart 10).

The 18 small schools accounted for 267 graduates, or 5.4 per cent of all graduates; the 18 large high schools produced 2,999 graduates, or 61.2 per cent.

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a summary of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1966-67.

The 60,436 ninth grade students in 1963-64 were enrolled in 426 complete and 57 incomplete public and non-public high schools. Of this total number of ninth grade students, 40,850 or 67.6 per cent were graduated from 388 complete high schools in 1967. The distribution of all Kentucky high schools by type of organization and control are shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private and Parochial		State, Federal and Regional		Total	
	63-64	66-67	63-64	66-67	63-64	66-67	63-64	66-67	63-64	66-67
Grades 7-12	70	59	48	34	2	3	6	5	126	101

Source of data: State Bulletin Series, Kentucky High Schools. Vol XXXII (May, 1964), and Vol. XXXV (May, 1967), Kentucky Department of Education.

Table 1 presents data by districts on 35,952 public school graduates of 313 high schools in county and independent districts and 7 special high schools.

Table 2 shows similar combined data by counties for 4,898 graduates of 68 non-public high schools.

Table 3 provides a summary by counties of all ninth grade enrollment (1963-64), all high school graduates, 1967, and total students enrolling in college or University in the Fall of 1967. A new feature of Table 3 is the numerical index of ninth grade pupils per 1,000 in 1963-64 reported as enrolling in college in 1967. This measure reported by counties is a product of per cent completing high school times per cent graduates entering college. The approximate national average for this index is seventy-five per cent times fifty-three per cent or 400 per 1,000 ninth grade pupils enrolling in college four years later. The Kentucky average survival rate for ninth grade pupils to college is 301 per 1,000.

A concluding summary page combining data for Tables I and II shows percentage distribution by sex and type of school for all graduates.

For possible interest and use by regional study groups, combined data for public and non-public high schools are summarized by KEA educational districts in Table 4.

Graphic portrayal of the data arranged in a regional pattern is presented in Charts 5, 6, and 7.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The brief trends data on holding power and graduates in this section, even of short duration, provide some benchmarks for appraising extent and rate of change in holding power in Kentucky. Though limited to a measure of quantity only, these data provide important indices to aid in program evaluation and as a base for further study.

Indication of Holding Power

As a general measure of holding power the tables and charts in this section provide a summary of the ten graduating classes since the full-financing of the Minimum Foundation Program in 1956-57. The majority of graduates of 1967 were enrolled in the second grade in the school year 1956-57.

Table 5 presents state-wide data by school districts on survival rates and whereabouts of graduates of public high schools for the ten year period, 1958-1967 inclusive.

Similar data for non-public high schools by counties are presented in Table 6.

Table 7 shows the combined data for all high schools and provides, in a limited way, a measure of the growth of the total secondary program (grades 9-12) in Kentucky.

Size of Graduating Classes

A new set of data on size of graduating classes of public high schools is introduced in the report. The first analysis of relationships of size of school, ninth grade enrollment, number of graduates, and graduates reported entering college was reported in 1961 for the class of 1960.[1] These data for public high schools are reproduced in Tables 8 and 9 of this report and are used as baseline data for measuring change on the same variables for the Class of 1967. Graphic portrayal of the data is provided in Chart 9.

Focus on the size of graduating classes as an indicator of the degree of breadth of program that might be expected in an average comprehensive high school was emphasized by Conant in his study of The American High School Today.[2] One characteristic of a modern comprehensive high school advanced in the Conant report of 1959 is that it should have a minimum of one hundred students in the graduating class in order to provide at a reasonable cost a basic program of education for all youth in its general attendance area.

Estimated data on Kentucky public high schools for 1957-58 as reported by Conant, final data for 1957-58, and current data for the Class of 1967 are shown below:

Year	Total No. 12th-Grade Students	12th-Grade Students in Schools with 12th-Grade Enrollment of Less than 100		Total No. Schools Offering Diplomas	Schools Offering Diplomas with 12th-Grade Enrollment of Less than 100	
		Number	Per cent		Number	Per cent
1957-58*	22,860	14,835	65	423	386	91
1957-58**	23,551	15,187	64	413	365	88
1966-67	37,651	10,387	28	320	186	58

*Estimate used in Conant report
**Final Data. Source: Kentucky Department of Education

---

1. Department of Education. Graduates Kentucky High Schools, 1960. (Frankfort, Ky.: State Department of Education). Educational Bulletin, Vol. XXIX, No. 5, 1961.

2. James B. Conant. The American High School Today (New York: McGraw-Hill Book Co., 1959) p. 132.

From the above data, it will be observed that a dramatic reversal has taken place in the number of graduates from small and large high schools in a relatively short span of time. Merger and consolidation have enabled local school districts to reduce the number of schools offering diplomas from 423 schools (Conant report) in 1957-58 to 320 schools in 1966-67--a reduction of 103 schools or 24 per cent. The number of high schools offering diplomas with 12th-grade enrollment less than 100 was reduced from 386 to 186--a reduction of 200 schools or 52 per cent--reflecting a combination of increased enrollment and consolidation of schools in the past eight years.

The data on relationships of size of school, ninth grade enrollment, and graduates to college for the non-public school classes of 1967 are shown in Table 10 and graphically portrayed by four broad graduation size groups in Chart 10.

County-Wide Summary Data

By way of a final summary, the three measures used throughout the report--holding power, graduates, and survival rate of ninth grade to college--for public and non-public schools are consolidated into two tables showing relative standings of counties as geographic units in a "standard nine" distribution. Holding power as measured by graduates per 1,000 ninth grade enrollment four years earlier is distributed by counties in Table 12 and graduates to college, Table 13.
